-  World-Class Performance with RGB Lighting

PERFORMANCE WHERE YOU NEED IT

Powered by the new Intel Core i7-13700KF 13th Gen Raptor Lake processor, the new Yari X13-02 offers incredible definition for gamers who want a powerful experience!

Thanks to Intel's Hyper-Threading the core-count is effectively doubled, to 24 threads. Intel® Core™ i7-13700KF has 30MB of L3 cache and operates at 3.4 GHz by default, but can boost up to 5.4 GHz, depending on the workload.

PERFECT VIEW INSIDE YOUR PC

If you're pushing the limits in your gaming, live streaming, or working with large animations and 3D rendering then the Yari X13-02 with 32GB - DDR5 5200MHz memory is what's needed to take it up a notch while unleashing performance no matter how extreme things get on any platform. Equipped with 1TB NVMe SSD plus a 2TB - 3.5" Hard Drive not only will it keep your PC ticking along nicely, but it'll also ensure that your load times are as low as possible.

POWERFUL CONNECTIVITY FOR A POWERFUL PERFORMANCE

Pushing your rig to be max, we equipped our Yari X13-02 with a powerful Intel Z790 motherboard to improve system performance with even higher clock speeds, more cores and support for faster DDR5 memory than ever before and prepared for this onslaught with enhanced performance tuning, cooling, power delivery and connectivity.

SETTING THE STAGE TO BREAK ALL LIMITS

We equipped our Yari X13-02 with a powerful 850W 80 PLUS Gold power source that provides energy efficiency and reduces consumption. The 240mm AIO Liquid Cooling system ensures superior cooling for optimal heat dissipation while 6 powerful preinstalled ARGB fans provide ultimate airflow for the best performance without hotspot or lagging issues on any PC game!
